

A)

PITCHED AND NON-PITCHED PERCUSSION INSTRUMENTS

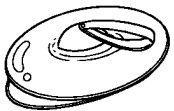

Pitched percussion instruments, like a marimba and a xylophone, make specific musical notes.

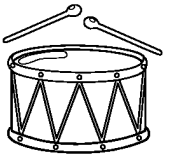

When we hit or strike them, they play different notes.

Pitched percussion instruments help us play melodies and tunes.

Non-pitched percussion instruments, like drums and cymbals, don't make specific notes. They make sounds of different volumes and types.

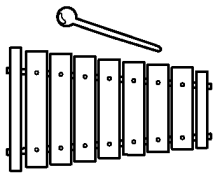

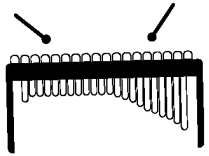

Non-pitched percussion instruments ones add rhythm and excitement to music.

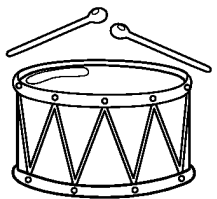

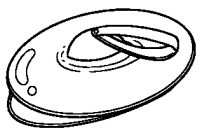

Both types are important in making music sound great!

B)

PITCHED AND NON-PITCHED PERCUSSION INSTRUMENTS

..... percussion instruments, like a marimba and a, make specific musical When we them, they play different notes. Pitched percussion instruments help us play

..... percussion instruments, like and cymbals, don't make specific They make of different volumes and types. Non-pitched percussion instruments add

Both types are in making music sound!
